The Rhode Island Children’s Cabinet

Strategic Plan 2015 – 2020

Strong Governance, Strong Children, Strong Future

#RIKidsCabinet    www.kids.ri.gov
Governor Gina Raimondo and the members of her Children’s Cabinet thank Casey Family Programs for funding critical staff capacity and technical assistance for the Children’s Cabinet. They are also grateful to Elizabeth Gaines from the Forum for Youth Investment and the National Children’s Cabinet Network for her assistance throughout the Cabinet’s strategic planning process.

The Children’s Cabinet applauds agency staff and community partners from across Rhode Island who have contributed to its strategic plan and looks forward to future work together.
Letter from Governor Gina Raimondo

As a mom, I am committed to ensuring that my children access every opportunity possible. As Governor, I believe that no matter what a child’s zip code is, every child should have a chance for opportunity in Rhode Island.

When I took office, Rhode Island ranked 31st in the nation in terms of overall child well-being and last in New England. Nearly 20% of Rhode Island’s over 200,000 children lived in households with incomes below the federal poverty threshold, and thousands more lived in households depending on state intervention or assistance to meet basic needs.

Statewide, children and youth rely on government to provide opportunity and high-quality services like coordinated health care and appropriate learning environments. Despite substantial investments, disjointed service delivery across agencies, significant gaps in evidence-based programming, and disappointing child and youth outcomes persist in our State.

Only 37.4% of our students read at grade-level by third grade. Recent analysis from the RI Data Sharing Project found that only 64% of the students who graduated from a Rhode Island Public School in four years enrolled in college the following fall. Of those students who enrolled full-time at a Rhode Island public institution, only 45% persisted into their second year of college.

Since my first day as Governor, I have been working hard to rebuild our economy. In order for our economy to rebound, we need to have healthy families and academically-prepared kids. Our future depends on our children and youth staying healthy, completing high school and college, finding work, and developing the skills and leadership capacity necessary to carry Rhode Island forward. I have reconvened the Children’s Cabinet so that we can be certain our children, youth and families are not hindered by a fragmented, inefficient or unresponsive government system that does not work actively on their behalf.

Together, we will work to improve outcomes for our children and youth. Please join us as we step forward for stronger governance, stronger children, and a stronger future for Rhode Island.

Governor Gina M. Raimondo
Children’s Cabinet Strategic Plan
2015-2016

What Drives Us: Our Mission

We, the leaders and agencies serving children and families in Rhode Island, come together to ensure that our children and youth have opportunities for safe, healthy and bright futures. By providing the overarching leadership and holistic approach necessary to improve the well-being of our children and youth, we set our State on a path toward a more stable and successful future.

What We Strive Toward: Our Vision

All Rhode Island children have an opportunity for safe, healthy and bright futures.

What We Aim to Do: Our Goals

1. Improve the health, education, and well-being of all children and youth in Rhode Island.
2. Increase the efficacy, efficiency, and coordination of service delivery.
3. Improve data-driven, evidence-based decision-making through strengthened data sharing capacities among agencies and research partners, while adequately protecting the privacy rights of children.

3. Improve Governance
2. Improve Services
1. Improve Outcomes for Children & Youth
Our Authority and Composition: R.I.G.L. §42-72.5(1-3)

Governor Gina Raimondo reconvened the Children’s Cabinet in July 2015, after working with the General Assembly to revise the statute establishing the Cabinet as a decision-making entity for children. Pursuant to R.I.G.L. §42-72.5 (1-3), we are charged with meeting at least one time per month and authorized to engage in interagency agreements and appropriate data-sharing to improve services and outcomes for children and youth. Governor Raimondo has designated Elizabeth Roberts, Secretary of the Executive Office of Health and Human Services, as chair. She has asked Ken Wagner, Commissioner of Elementary & Secondary Education, to serve as vice chair.

![Photo: First meeting of Governor Raimondo’s Children’s Cabinet, July 2015.](image)

2015 Statutorily-Authorized Cabinet Members:

- **The Honorable Gina Raimondo**, Governor of the State of Rhode Island
- **Elizabeth Roberts**, Secretary of the Executive Office of Health and Human Services
- **Dr. Ken Wagner**, Commissioner of Elementary & Secondary Education
- **Dr. Nicole Alexander-Scott**, Director of the Dept. of Health
- **Regina Costa, Esq.**, Child Advocate
- **Melba Depeña Affigne**, Director of the Dept. of Human Services
- **Michael DiBiase**, Director of the Dept. of Administration
- **Scott Jensen**, Director of the Dept. of Labor and Training
- **Jamia McDonald**, Chief Strategy Officer, Dept. of Children, Youth & Families
- **Maria Montanaro**, Dir. of Dept. of Behavioral Healthcare, Developmental Disabilities & Hosp.
- **Dr. Jim Purcell**, Commissioner of Post-Secondary Education
How We Work: Our Guiding Principles

As agency leaders we commit to doing more than managing a singular agency. Together, we define how the State supports our children and youth. In doing so, we ascribe to the following principles:

1. Leadership from the Top:
   • The Governor and her Cabinet are responsible for ensuring the forward progress of all Children’s Cabinet strategic and action plans.

2. The State Has a Responsibility:
   • The Cabinet recognizes that the State has a critical role to play in providing appropriate services and supports to children, including, but not limited to: physical, mental and behavioral health, foster care, medical insurance, quality education, stable housing, safe schools, communities and environments, and opportunities to engage civically and socially.

3. Cross-Agency Communication and Coordination Improves Service Delivery:
   • The Cabinet utilizes reliable methods for regular communication and coordination between agencies on all matters relating to children and youth.

4. Smart Use of Data Improves Outcomes for Children and Youth:
   • Cabinet agencies are best able to address fragmented service delivery and inequitable outcomes by engaging in data collection and data sharing that helps to identify service needs, gaps in services, and opportunities for greater impact.

5. Strong Partnerships Make a Positive Impact on Children and Youth:
   • The Cabinet is strengthened by leveraging strong partnerships across agencies and with the legislature, judiciary, local government, providers, schools, families, and community partners. Collectively, we can positively impact our children and youth.

6. Informing and Engaging the Public is Key to Our Future Success:
   • The Cabinet supports public education campaigns to raise awareness around issues facing Rhode Island’s children and youth. The Cabinet also seeks public involvement and input to address those issues.
What We Do: Our Core Strategies

We will utilize the following strategies to improve governance for the children and youth of Rhode Island.

1. A Common Agenda
   - As we lead and manage state government, we will be driven by shared goals and desired outcomes for children and youth.
   - We will engage our partners in government from other state agencies, the General Assembly, and the judiciary to make progress toward our desired outcomes for children and youth.
   - To gain a common understanding of problems and develop shared solutions, we will facilitate and support cross-agency planning and action.

2. Shared Measurement & Accountability
   - To keep ourselves accountable, we will set targets and measure our outputs annually.
   - We will govern informed by shared and reliable data on child well-being.
   - We will utilize data dashboards to regularly track progress toward desired outcomes for children and youth.
   - We will facilitate interagency data sharing and analysis to better serve children and youth through targeted, evidence-based interventions.

3. Continuous Communication & Mutually Reinforced Activities
   - We will meet in person once per month and communicate as needed between meetings regarding all Children's Cabinet activities and responsibilities.
   - We will request updates from and review requests made by interagency and public-private workgroups focused on issues impacting children and youth to ensure that the expertise and recommendations they develop are leveraged and implemented appropriately.
   - To facilitate communication and coordinate our efforts, we will rely on our full-time Children's Cabinet Policy Director, who will work regularly with agency staff and stakeholders.
   - We will communicate with stakeholders promptly about emerging and pressing issues impacting children so that our work is appropriately responsive and informed.

4. Coordinated Budget Development
   - We will assess overall investments in children as we set annual budget priorities. We will develop and utilize child and youth resource maps to track spending toward desired outcomes, identify needed investments, and create efficiencies in budgetary planning across agencies.
   - We will be creative and efficient in funding initiatives for children and youth by leveraging our unique capacity to secure federal funds, seeking cross-agency planning and implementation grants, and funding cross-agency trainings that are focused on improving outcomes for kids.

5. Public Engagement
   - We will identify opportunities to support public education campaigns across agencies and stakeholder groups.
   - We will regularly seek public input on Children's Cabinet initiatives.
   - We will facilitate opportunities to hear directly from Rhode Island's children, youth, and families.
How We Assess Our Work: Core Strategy Metrics

We know that we are not going to change long-term outcomes for children and youth unless we change the way we do business and keep each other accountable. We will ensure that our governance strategies produce results by using the following metrics to track our outputs annually over the next five years.

<table>

“At the end of the day, a kid deserves a chance and may not get it unless we come together and do our job right.”
~ Governor Gina M. Raimondo
How Our Work Impacts Children: Our Desired Outcomes

As we work to improve governance and service delivery, we will work to achieve our primary goal: improved health, safety, and well-being for all children in Rhode Island.

To ensure that we move toward this goal over the next five years, we will focus our attention on how well our children and youth fare in five outcome areas that are critical to their well-being and holistic development—physical health and safety, behavioral and emotional security, academic empowerment and career readiness, social, cultural and civic engagement, and family and community stability.

As we do so, we will pay attention to disparities in child and youth outcomes that are rooted in racial inequity, income-level, and other special needs. We will take bold, data-driven action to intervene and address disparities. When a child in Rhode Island receives services and supports from the State, we will work to ensure that those services and supports are delivered effectively, efficiently, and equitably.

Children’s Cabinet Desired Outcomes

The Children’s Cabinet believes that all children and youth in Rhode Island should be:

- Physically Healthy & Safe
- Behaviorally Able & Emotionally Hopeful
- Academically Empowered & Career Ready
- Socially, Culturally, & Civically Engaged
- Supported by Stable Families & Communities
Monitoring Our Impact: Objectives and Progress Indicators

We have identified the 12 objectives below as interrelated and critical to achieving our desired outcomes for children and youth. We recognize that each objective requires tight government coordination, and our staff have already begun working together and with community stakeholders to address each one. We will make coordinated efforts to achieve each objective and use shared metrics to track progress.

At the same time, we will take a broad look at child and youth outcomes by monitoring key indicators of child and youth well-being through data dashboards. Together and with our community partners, we will work to grow confidence in the validity and proxy power of a shared set of child wellbeing indicators. As we are driven to not just improve outcomes but also to make them more equitable, we will work to regularly disaggregate dashboard data by race, income-level, and other special needs.

### Cabinet Objectives by Desired Outcome Area and Age-Range

<td></td>
<td>Children and families are supported by stable wages and housing.</td>
<td>Families with children maintain stability and meet basic needs during periods of household unemployment or under-employment.</td>
</tr>
</tbody>
</table>
As we develop our dashboards, we are instructed by the following reasoning, potential indicators and baseline data.

**Physically Healthy and Safe**
Rhode Island’s Rite Care program and successful implementation of the state-wide health exchange have connected more children to health coverage in recent years, resulting in approximately 96.7% of Rhode Island children under the age of 18 being enrolled in health insurance. While research demonstrates that access to health insurance coverage is critical to ensuring that children and youth access a medical home and appropriately address physical, oral, behavioral and reproductive health concerns, we recognize that we must also address the social and environmental determinants of health. Rhode Island continues to experience persistent disparities in childhood obesity, asthma, lead poisoning and infant mortality—a striking disparity disproportionately affecting African Americans. We will work to address child health disparities and focus on critical periods and points of transition during a child’s life course to ensure that health services are effectively coordinated and equitably available. We support systemic change to ensure that children and youth have access to family-centered systems of care and that they live and learn in healthy, safe environments regardless of zip code.

</tbody>
</table>

**Behaviorally Able and Emotionally Hopeful**
Nearly a quarter of the ninth through twelfth graders who participated in the most recent Rhode Island High School Risk Behavior Survey “felt sad or hopeless almost every day for two weeks or more,” and over 560 reported more than one suicide attempt. As the motto of our state is “Hope,” we commit to looking closely at the service needs of children and youth who face alienation, loneliness, and a lack of connection to society due to mental, emotional, and behavioral health conditions. We know that children and youth who fail to receive needed treatment at key transition points often find themselves in prison, homeless and/or struggling with addiction later in life. In an effort
to provide timelier, more cost-effective, and holistic interventions, we will promote resilience and hopefulness by strengthening and better aligning mental and behavioral health services for children and youth in Rhode Island.

**Objective:** Children with (or at risk of) mental and behavioral health issues get appropriate treatment and make successful transitions.

**Potential Indicators** *(Available Baseline by FY)*

- Rate of hospitalizations for children under 18 due to mental health conditions. *(13: 12.8%)*
- Rate of suicide amongst children under 18. *(14: 2.8/100,000)*
- % of adolescents with special health care needs who receive services necessary to make transitions to adult health care. *(10: 43%)*
- % of 9th-12th graders reporting that they felt sad or hopeless in the last two months *(15: ~25%)*
- % of infants born at high-risk who receive evidence-based home visiting. *(16: 26%)*
- % of Rhode Islanders who are limited by poor mental or physical health for 14 days/month. *(16: 11.5%)*

**Academically Empowered and Career Ready**

Approximately 4,000 sixteen to nineteen year olds in Rhode Island are not in school and not working. Together, we want to ensure that our children and youth are engaged in and prepared for school, able to complete college and equipped with valuable career skills that are in demand and yield a sustainable wage in Rhode Island. We know that readiness relies on appropriate early learning opportunities, regular school attendance, necessary classroom supports, and attention to the physical and mental health needs of students. We also know that graduating from high school is not enough to ensure that youth remain empowered. This is why we are interested in identifying and coordinating services to ensure that youth and families access available financial and social supports to enroll in and complete college, and why we will seek opportunities for youth and young adults to be appropriately exposed to the job skills that will help them become productive Rhode Islanders.

**Objective:** Children are ready for elementary school and have access to high-quality early learning and developmental programs.

**Objective:** Children regularly attend, actively participate & progress appropriately in school.

**Objective:** Adolescents and young adults access, afford, and complete college.

**Objective:** Adolescents and young adults prepare for and thrive in appropriate, in-demand jobs.

**Potential Indicators** *(Available Baseline by FY)*

- % of early learning programs meeting benchmarks. *(16: 17%)*
- # Children enrolled in CCAP. *(14: 13,438)*
- % of four year olds in state-funded pre-K. *(16: 4.7%)*
- # children in Early Head Start *(16: 629)*
- % of districts providing full-day kindergarten. *(16: 89%)*
- % of children ages 3-5 who receive pre-school special education services *(14: 8%)*
- % of students reading at grade level in 3rd grade and 8th grade. *(16: 37.4% & 35.1%)*
- # of in-school arrests.
- # of out of school suspensions.
- % of students who are chronically absent.
- % of students participating in AP courses. *(15: 14%)*
- 4, year graduation rate. *(14: 81%)*
- % of students requiring remediation at CCRI. *(16: 66%)*
- % of students enrolling in a state college.
- % of students enrolling in college.
- % of students completing college.
- % of in-state students with costs covered.
- % of sophomores, juniors and seniors concentrating in CTE programs. *(15: 9%)*
- % of juniors and seniors earning industry recognized credentials. *(16: 8%)*
- % of out of school and long-term unemployed participating in internships.
Socially, Culturally, Civically Engaged
Across Rhode Island, children and youth access and utilize our schools, youth centers, health clinics, and other social services. As consumers of our programs and services, we are interested to hear their feedback and concerns. We know that young people are more likely to vote and engage with government if they access leadership development opportunities and feel socially, culturally, and civically connected. We also know that the more disconnected a child becomes from school, work, or community, the more likely he or she is to become involved in the juvenile or criminal justice system. This is why we intend to more fully understanding the range of leadership development and community-based programming that is available to children and youth across Rhode Island. As government leaders, we support coordinated preventative interventions to keep our youth law-abiding, active, and proud residents of Rhode Island.

Supported by Stable Families and Communities
According to the Economic Progress Institute, a Rhode Island family needs to earn an income that is between 2.5 to 3 times more than the federal poverty threshold to make ends meet in Rhode Island. As 19.8% of Rhode Island children lived in households with incomes below the poverty threshold last year, and over 9,000 children lived in families receiving cash assistance from the State, we remain cognizant of the struggles that many parents and families face in maintaining safe housing and stable incomes to support their children. We are also keenly aware of the impacts of poverty on a child’s development and future outcomes. This is why we will work to strengthen the quality and delivery of programs and services for poor families promote emotional and economic stability, independence, and long-term prosperity amongst families.

What’s Already Happening: Our Partners

We know that our agencies and community partners have already come together around several issues facing children, youth, and families, and that they have developed expertise related to our objectives. We call upon the government and community partners listed below to advise and inform our decision making, and we commit to reserving time during our monthly meetings for this purpose. We also look forward to working with key research partners, including but not limited to Rhode Island Innovation Policy Lab (RIIPL), DataSpark at ProvPlan, R.I. KIDS COUNT, and the Economic Progress Institute. Together, we will look closely at available data, answer tough policy questions, and make a positive impact on children and youth in Rhode Island.

What to Expect: Our Timeline

Over the next five years, we will develop our data, service delivery, and budget planning capacities to improve governance for children and youth in Rhode Island. We will also launch initiatives to achieve our objectives and meet monthly to stay abreast of emerging issues impacting children and youth. We will return to our strategic plan annually to update action plans, track our outputs, and assess our progress toward desired outcomes for children and youth.

Strategic Plan Timeline

Year 1 (July 2015-July 2016)

- Develop shared progress indicators and data dashboards for each of the Cabinet’s desired outcomes and objectives for children and youth.
- Engage in shared data collection and analysis to track new metrics.
- Convene expert staff from Cabinet agencies to identify and outreach to workgroups focused on the Cabinet’s desired outcomes and objectives for children.
- As developed, launch pilot initiatives to improve service delivery, achieve objectives and improve child and youth outcomes.
- By July 2016, identify full set of funding streams impacting children and youth and utilize resource maps to disaggregate streams by desired outcomes for children, departments, age-group, and other key indicators identified by the Cabinet.

Years 2 (July 2016-July 2017)

- Monitor annual progress toward desired outcomes using data dashboards.
- Engage research partners to develop governance and policy recommendations to address trends identified through data dashboards.
- Continue launching pilot initiatives as developed, and work to bring prior year pilots to scale.
- Utilize resource maps and data dashboards to inform agency budget development.
- Promote shared children’s agenda amongst the General Assembly and public.

Years 3-5 (July 2017-2020)

- Continue monitoring annual progress toward desired outcomes using data dashboards.
- Continue launching and scaling pilot initiatives as developed.
- Continue to utilize resource maps and data dashboards to inform agency budget development.
- Seek new public/private funds to support targeted cross-agency initiatives.
- Informed by partner research and advocates, work together to promote budget and legislative changes, as needed.
**What’s Next: Taking Action Now**

The following three initiatives are in development. They will align policies and performance measures across agencies to improve outcomes for children and youth in Rhode Island.

**The Getting to Kindergarten Initiative:**
A multi-agency effort, involving the Executive Office of Health and Human Services (OHHS), Dept. of Children, Youth and Families (DCYF), Dept. of Health (DOH), Dept. of Human Services (DHS), and Dept. of Administration (DOA), to ensure that the infants, toddlers and young children who touch the child welfare system remain healthy, develop appropriately and become school-ready by kindergarten. This initiative will connect children (ages 0-5) to a continuum of early childhood services, including Early Intervention, Home Visiting, Early Head Start, and high-quality child care.

- **Anticipated:** January 2016
- **Children Impacted:** ~700 vulnerable children between the ages of 0-5.
- **Well-Being Outcomes Impacted:** Healthy and Physically Safe; Behaviorally Able and Emotionally Hopeful; Academically Empowered and Career Ready.
- **Strategic Outputs Achieved:** Agency partnerships; Data-driven policy interventions; Budget efficiencies.

**Behavioral and Mental Health Transitions Mapping:**
A system review of children’s behavioral and mental health services and gaps in services provided by state agencies, including the Department of Children, Youth and Families (DCYF), Dept. of Behavioral Health, Developmental Disabilities and Hospitals (BHDDH), Executive Office of Health and Human Services (EOHHS), and the Dept. of Health (DOH), focused on identifying areas for interagency alignment and improving the sufficiency of the service continuum.

- **Anticipated:** March-April 2016
- **Children Impacted:** 10,000+ children between the ages of 0-21 experiencing behavioral and mental health concerns.
- **Well-Being Outcomes Impacted:** Physically Healthy and Safe; Behaviorally Able and Emotionally Hopeful.
- **Strategic Outputs Achieved:** Interagency agreements; Budget efficiencies; Research partners engaged; Reports issued; Workgroups convened; Public input sought.

**Leveraging Federal Workforce Development Funds to Support Under-/Unemployed Youth and Families in Rhode Island:**
A tightly coordinated, data-driven effort by the Dept. of Labor and Training (DLT), Rhode Island Dept. of Education (RIDE), Office of the Post-Secondary Commissioner (OPC), Dept. of Children, Youth and Families (DCYF), and Dept. of Human Services (DHS) to utilize federal Workforce Investment and Opportunity Act (WIOA) funds to directly support the workforce development needs of children and youth across Rhode Island.

- **Anticipated:** May-June 2016
- **Children Impacted:** TBD
- **Well-Being Outcomes Impacted:** Academically Empowered and Career Ready; Supported by Stable Families and Communities.
- **Strategic Outputs Achieved:** Interagency agreements; Budget efficiencies; Use of funds awarded to State to advance Cabinet outcomes; Public engagement campaigns coordinated across agencies.
